

Industrial water softener with hardness analyser

Sweden, 240 m3/d

Project Description:

Lenntech has engineered, manufactured and assembled an industrial water softener for a chemical plant in Sweden. The softener was used to exchange Calcium and Magnesium ions from the water source. The remaining hardness in the water could be monitored with the hardness analyser built in on the system. The system is completely from European origin.

Scope of Work:

- Engineering, manufacturing and assembly
- Industrial skidmounted softener
- Hardness analyser
- Pre-programming of the control valves

Project duration:

December 2020 to January 2021

Project location:

Sweden

Product quality:

Total hardness < 0.1 dH

Project application:

Process water

Typical contract amount:

10.000 – 25.000 EUR
