DOWEX™ MONOSPHERE™ M-31 and M-31 Catalyst Ion Exchange Resins

A Macroporous Strong Acid Catalyst

Product	Туре	Matrix	Functional group
DOWEX™ MONOSPHERE™ M-31	Uniform size beads, macro	Styrene-divinylbenzene	Sulfonic acid
DOWEX M-31	Gaussian beads, macro	Styrene-divinylbenzene	Sulfonic acid

	DOWEX MONOSPHERE M-31 (H) Catalyst		DOWEX M-31 (H) Catalyst	
	Specification	Typical	Specification	Typical
Physical form	Hard opaque beads		Hard opaque beads	
Sphericity original	99% min.	99.8%	99% min.	99.8%
Wet volume acid capacity	1.85 meq/mL min.	1.95	1.7 meq/mL min.	1.8
Dry weight acid capacity	5.0 meq/mg min.	5.2	4.7 meq/mg min.	4.9
Water retention capacity	50-54% by wt.		50-54% by wt.	
Screen size	575 ± 50 mic.			
400-650 microns	> 95%	> 99%		
on 16 mesh			2.0% max.	1.0%
through 40 mesh	1% max.	0.5%	5% max.	2.5%
Shipping weight**	48 lbs/ft ³		47 lbs/ft ³	
	766 kg/cu. meter		760 kg/cu. meter	
Friability (avg. g/bead)		400		350
Surface area (m²/g)		30		30
Porosity (%)		33		33
Pore size (avg. size in angstroms)		200		200

General Information

Dow offers several excellent resin catalyst products for a wide verity of applications. Dow is a World Leader in the manufacture of high performance catalysts for commercial MTBE and TAME production. DOWEXTM M-31 and DOWEXTM MONOSPHERETM M-31 Catalysts are the benchmark catalysts for the industry, having a have a long history of *proven quality and trusted service*.

DOWEX MONOSPHERE M-31 catalyst is our high activity premium grade catalyst. High activity is imparted by Dow's unique uniform particle size technology, coupled with a high degree of sulfonic acid functionality. DOWEX MONOSPHERE M-31 is particularly suited to fixed bed operations running rapid throughput and for all types of TAME production facilities. DOWEX MONOSPHERE M-31 is ideal for older "arco type" MTBE production units, looking for more throughput capacity.

DOWEX M-31 catalyst is our standard grade product for general catalytic application. This catalyst has unmatched durability and dependability within the MTBE/TAME industry.

^{**} As per the backwashed and settled density of the resin, determined by ASTM D-2187.

Warning: Oxidizing agents such as nitric acid attack organic ion exchange resins under certain conditions. This could lead to anything from slight resin degradation to a violent exothermic reaction (explosion). Before using strong oxidizing agents, consult sources knowledgeable in handling such materials.
