

Product Data Sheet

## FilmTec™ BW30XFR-400/34i Element

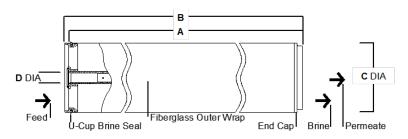

| Description  | Ideal for: reverse osmosis plant managers and operators dealing with challenging waters and wastewaters and seeking consistent high performance, long element life, increased productivity and higher water quality coupled with outstanding fouling resistance.   |  |  |  |  |  |  |  |
|--------------|--|--|--|--|--|--|--|--|
|              | <ul> <li>With proven performance, FilmTec<sup>™</sup> BW30XFR-400/34i:</li> <li>Delivers high quality permeate water while minimizing CAPEX and OPEX</li> <li>Offers the most effective cleaning performance, robustness and durability due to its widest cleaning pH range (1 – 13) and chemical tolerance, and the support of DuPont representatives</li> <li>Includes iLEC<sup>™</sup> interlocking end caps, reducing system operating costs and the risk of o-ring leaks that can cause poor water quality</li> </ul> |  |  |  |  |  |  |  |
| Product Type | Spiral-wound element with polyamide thin-film composite membrane   |  |  |  |  |  |  |  |

## **Typical Properties**

|                  |                    |   |                              | Permea          | te Flow     |                                  |                         |
|------------------|--------------------|---|------------------------------|-----------------|-------------|----------------------------------|-------------------------|
|                  | Activ              | e Area  | Feed Spacer                  | Ra              | te          | Typical Stabilized Salt          | Minimum Salt            |
| FilmTec™ Element | (ft <sup>2</sup> ) | (m²)  | Thickness (mil)              | (GPD)           | (m³/d)      | Rejection (%)                    | Rejection (%)           |
| BW30XFR-400/34i  | 400                | 37  | 34-LDP                       | 11,500          | 43          | 99.65                            | 99.4                    |
|                  |                    | 1   | Permeate flow and salt (     | NaCI) rejection | hased on    | the following standard test cond | litions: 2 000 ppm NaCl |
|                  |                    |   | 225 psi (15.5 bar), 77°F (   | , ,             |             | •                                | niono. 2,000 ppmnaoi,   |
|                  |                    | 2.  | I ( // //                    |                 |             | 5                                |                         |
|                  |                    | 3.  | Stabilized salt rejection is | s generally ac  | hieved with | in 24-48 hours of continuous us  | e; depending upon       |
|                  |                    | feedwater characteristics and operating conditions. |                              |                 |             |                                  |                         |
|                  |                    | 4.  | Sales specifications may     | vary as desig   | n revisions | take place.                      |                         |

5. Active area guaranteed ± 3%. Active area as stated by DuPont Water Solutions is not comparable to nominal membrane area often stated by some manufacturers.

## Element **Dimensions**

| Product<br>Stewardship                 | DuPont has a fundamental concern for all who m<br>for the environment in which we live. This concern<br>philosophy by which we assess the safety, health<br>products and then take appropriate steps to prote<br>environment. The success of our product steward     | n is the basis for our product stewardship<br>, and environmental information on our<br>ect employee and public health and our |  |  |  |

manufacture, use, sale, disposal, and recycle of each product.

| Customer Notice        | DuPont strongly encourages its customers to review both their manufacturing processes<br>and their applications of DuPont products from the standpoint of human health and<br>environmental quality to ensure that DuPont products are not used in ways for which they<br>are not intended or tested. DuPont personnel are available to answer your questions and to<br>provide reasonable technical support. DuPont product literature, including safety data<br>sheets, should be consulted prior to use of DuPont products. Current safety data sheets are<br>available from DuPont. |  |  |  |  |  |
|------------------------|---|--|--|--|--|--|
|                        | <ul> <li>Please be aware of the following:</li> <li>The use of this product in and of itself does not necessarily guarantee the removal of cysts and pathogens from water. Effective cyst and pathogen reduction is dependent on the complete system design and on the operation and maintenance of the system.</li> </ul>  |  |  |  |  |  |
| <b>Regulatory Note</b> | This product may be subject to drinking water application restrictions in some countries; please check the application status before use and sale.  |  |  |  |  |  |
