

## PENTEK® ECP SERIES PLEATED CELLULOSE POLYESTER CARTRIDGES

HIGHER WET STRENGTH THAN REGULAR CELLULOSE CARTRIDGES

Pentair® Pentek® ECP Series Cartridges are manufactured from a special formulation of resin-impregnated cellulose and polyester fibers.

This unique blend of materials provides a higher wet strength than regular cellulose cartridges. It also provides high flow rates and dirt-holding capacity, while maintaining extremely low pressure drop.

The media is pleated around a polypropylene core for added strength. The pleated endcaps of the standard cartridges are immersed in a thermo-setting vinyl plastisol. The Big Blue® cartridges have a molded endcap with gaskets. The pleated ends are sealed to the endcap with a thermoplastic adhesive. The overlap seam is sonically welded to reduce internal bypass, improving filtration efficiency.

ECP Series Cartridge endcaps feature a color-coding system for easy identification of micron ratings: tan (1 micron), white (5 micron), blue (20 micron), and yellow (50 micron).

ECP Series Cartridges contain more media surface area than most competitive cartridges. The Standard 10" ECP cartridge contains 6 ft<sup>2</sup> of media, where most cartridges contain only 4.5 ft<sup>2</sup>. Other available ECP cartridge sizes contain the following amount of media:

- Standard 10" cartridge: 6 ft<sup>2</sup>
- Standard 20" cartridge: 12 ft<sup>2</sup>
- BB 10" cartridge: 18 ft<sup>2</sup>
- BB 20" cartridge: 36 ft<sup>2</sup>
