

Heidra 150SG Pump

LENNTECH
WATER TREATMENT Solutions

The Godwin Heidra 150SG hydraulic submersible pump is a compact self-contained pumping unit featuring a diesel driven power pack and hydraulic pump end. With variable speed diesel engine power, the Heidra 150SG can meet a variety of flow and head requirements up to 362 m³/hr and total dynamic head requirements up to 15 metres.

It has the ability to handle solids up to 65 mm in diameter. It also has dry running capabilities, a cast steel impeller, providing a rugged dewatering / solids handling, hydraulic submersible pump ready to go anywhere.

Features

- 150 mm discharge connection. The quick release lever allows pipe work to be connected & disconnected very easily.
- Double mechanical seal in its own clean oil bath allows for indefinite dry running. Inboard seal: silicon carbide. Outboard seal: carbon or ceramic.
- Gear motor connections are standard SAE flange & shaft. Which allows the bearing bracket to plug directly together.
- Open solid handling impellers with replaceable wearplates.
- The SG (Slurry Gate) pump is designed specifically for handling slurries & sludges in addition to general pumping.
- Safe pump end no risk of electric shock or explosion.
- Alternative powerpack options available e.g. Highway trailer, Site trolley. Electric motor drive option also available.
- Godwin Power Pack GHPU15 as standard.
