

LEWATIT® MDS 200 H is a strongly acidic, gel type cation exchange resin in its H form containing fine beads of a uniform size. This high degree of monodispersity combined with fine, small beads enables fast kinetics.

LEWATIT® MDS 200 H meets the high requirements of industrial water treatment.

The special properties of this product can only be fully utilized if the technology and process used correspond to the current state-of-the-art. Further advice in this matter can be obtained from Lanxess, Business Unit Liquid Purification Technologies.

Common Description

| Delivery form | H ⁺ |
|------------------|----------------|
| Functional group | Sulfonic acid |
| Matrix | Styrenic |
| Structure | Gel |
| Appearance | Dark brown |

Specified Data

| Uniformity coefficient | | max. | 1.1 |
|--------------------------|-----|-----------|------|
| Mean bead size | d50 | mm | 0.33 |
| Total capacity (delivery | | min. eq/L | 2.3 |
| form) | | | |

This document contains important information and must be read in its entirety.

Typical Physical and Chemical Properties

| | | <u> </u> | |
|---|-------------|------------------|-----------|
| Bulk density for shipment | (+/- 5%) | g/L | 800 |
| Density | | approx. g/mL | 1.21 |
| Water retention (delivery form) | | approx. weight % | 45-50 |
| Volume change (H ⁺ - Na ⁺) | | max. approx. % | -8 |
| Stability pH range | | | 0-14 |
| Storage time (after delivery) | | max. years | 2 |
| Storage temperature range | | °C | -20 - +40 |
| Friability | | average g/bead | 600 |
| Friability | >200 g/bead | min. vol % | 95 |
| Ionic conversion H ⁺ | | min. eq. % | 99.8 |

Operation

| Operating temperature | | max. °C | 140 |
|--|-------------------|-----------------|------|
| Operating pH range | during exhaustion | | 2-14 |
| Bed depth for single column | | min. mm | 600 |
| Bed depth per component in mixed bed | | min. mm | 500 |
| Back wash bed expansion per m/h (20°C) | | % | 6 |
| Specific pressure loss kPa*h/m² (15°C) | | kPa*h/m² (15°C) | 4 |
| Max. pressure loss during operation | | kPa | 250 |
| Specific flow rate | | max. BV/h | 100 |

Regeneration

| HCI regeneration | concentration | approx. wt. % | 4-6 |
|---|--------------------------|----------------|-------|
| HCI regeneration | quantity co-current | min. g/L resin | 100 |
| HCI regeneration | quantity counter-current | min. g/L resin | 55 |
| H ₂ SO ₄ regeneration | concentration | approx. wt. % | 1.5-8 |
| H ₂ SO ₄ regeneration | quantity co-current | min. g/L resin | 120 |
| H₂SO₄ regeneration | quantity counter-current | min. g/L resin | 80 |
| Regeneration contact | | min. minutes | 20 |
| time | | | |
| Slow rinse at | | min. BV | 2 |
| regeneration flow rate | | | |
| Fast rinse at service flow | | min. BV | 2 |
| rate | | | |

Additional Information & Regulations

Safety precautions

Strong oxidants, e.g. nitric acid, can cause violent reactions if they come into contact with ion exchange resins

Toxicity

The safety data sheet must be observed. It contains additional data on product description, transport, storage, handling, safety and ecology.

Disposal

In the European Community Ion exchange resins have to be disposed, according to the European waste nomenclature which can be accessed on the internet-site of the European Union.

Storage

It is recommended to store ion exchange resins at temperatures above the freezing point of water under roof in dry conditions without exposure to direct sunlight. If resin should become frozen, it should not be mechanically handled and left to thaw out gradually at ambient temperature. It must be completely thawed before handling or use. No attempt should be made to accelerate the thawing process.

Packaging

The experience has shown that the packaging stability for reliable resin containment is limited to 24 months under the storage conditions described above. It is therefore recommended to use the product within this time frame; otherwise the packaging condition should be checked regularly.

Safety precautions

Strong oxidants, e.g. nitric acid, can cause violent reactions if they come into contact with ion exchange resins.

Toxicity

The safety data sheet must be observed. It contains additional data on product description, transport, storage, handling, safety and ecology.

Disposa

In the European Community Ion exchange resins have to be disposed, according to the European waste nomenclature which can be accessed on the internet-site of the European Union.
