## DIAION™ SA20AP

DIAION™ SA20AP is a gel type strongly basic anion exchange resin. It is type II resin and has a standard cross-linkages and anti-clumping characteristics. A wide range of applications, especially in a field of manufacturing and processing pure water in regenerable mixed bed, is recommended.

| Product                                     |   |                       |
|---|---|-----------------------|
| Grade Name                                  | DIAION <sup>TM</sup> SA20AP               |                       |
| Туре  | Strong Base Anion                         |                       |
| Matrix                                      | Styrene-DVB, Gel                          |                       |
| Functional Group                            | Type II (dimethylethanol ammonium groups) |                       |
| Ionic Form                                  |   | Cl                    |
| Specification                               |   |                       |
| Whole Bead Count                            | -   | 90 min.               |
| Salt Splitting Capacity                     | meq/mL                                    | 1.3 min.              |
| Water Content                               | %   | 45 - 52               |
| Particle Size Distribution on 1180 μm       | %   | 5 max.                |
| Particle Size Distribution thr. 300 $\mu m$ | %   | 1 max.                |
| Effective Size                              | mm  | 0.40 min.             |
| Uniformity Coefficient                      | -   | 1.6 max.              |
| Typical Properties                          |   |                       |
| Shipping Density                            | g/L                                       | 670                   |
| Mean Particle Size                          | μm  | 630                   |
| Particle Density                            | g/mL                                      | 1.11                  |
| Total Swelling (Cl to OH)                   | %   | 24                    |
| Recommended Operating Conditions            |   |                       |
| Maximum Operating Temperature               | °C  | 60 (Cl <sup>-</sup> ) |
|   |   | 40 (OH <sup>-</sup> ) |
| Operating pH Range                          |   | 0 - 14                |
| Minimum Bed Depth                           | mm  | 800                   |
| Service Flow Rate                           | m/h                                       | 10 - 60               |
| Regenerant                                  |   | NaOH                  |
| Regenerant Concentration                    | %   | NaOH 2 - 8            |
| Regenerant Level                            | g/L                                       | 50 - 200              |
| Regenerant Flow Rate                        | m/h                                       | 2 - 8                 |
| Total Rince Requirement                     | BV  | 2 - 10                |

## DIAION™ SA20AP

## **Hydraulic Characteristics**

The approximate pressure drop at various temperatures and flow rates for each meter of bed depth of  $\mathsf{DIAION}^\mathsf{TM}$  SA20AP resin in normal down flow operation is shown in the graphs below.

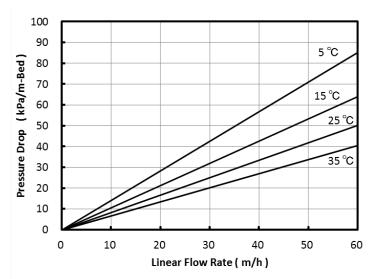

Fig. 1 Pressure Drop of SA20AP

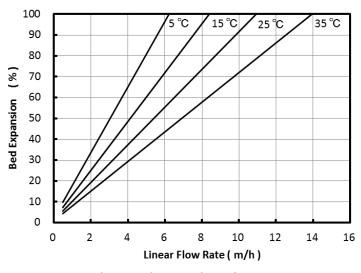

Fig. 2 Bed Expansion of SA20AP
