

OptiSpense* ADJ5150

liquid caustic 25%

- Easy-to-use liquid
- Alkalinity adjustment
- Low freeze point

description and use

OptiSpense ADJ5150 is a 25% caustic soda solution used to control boiler water alkalinity. Because this product is a liquid, the hazards associated with dissolving dry caustic soda are significantly reduced. OptiSpense ADJ5150 has a freeze point of approximately -16°C (3°F) and as such is much less temperature sensitive than 50% caustic solutions.

treatment and feeding requirements

Proper treatment levels for OptiSpense ADJ5150 depend on many factors particular to a given installation. The product should be used in accordance with control procedures that SUEZ establishes for a specific application.

OptiSpense ADJ5150 may be fed neat or diluted to any convenient strength with softened makeup, condensate, or feedwater.

general properties

Physical properties of OptiSpense ADJ5150 are shown on the Material Safety Data Sheet, a copy of which is available on request.

packaging information

OptiSpense ADJ5150 is a liquid blend, available in a variety of containers and delivery methods. Contact your SUEZ representative for details.

Water Technologies & Solutions fact sheet

storage

Store OptiSpense ADJ5150 at moderate temperatures and protect from freezing. If frozen, thaw completely and mix thoroughly prior to use.
