#### CME3-2 A-R-G-E-AQQE

Product No.: On request

Compact, reliable, horizontal, multistage, end-suction centrifugal pump with axial suction port and radial discharge port. Pump materials in contact with the liquid are in high-grade stainless steel. The mechanical shaft seal is a special designed, unbalanced O-ring seal. Pipework connection is via internal Whitworth pipe threads, Rp (ISO 7/1).

The pump is fitted with a 1-phase, fan-cooled, permanent-magnet, synchronous motor. The motor efficiency is classified as IE5 in accordance with IEC 60034-30-2.

The motor includes a frequency converter and PI controller in the motor terminal box. This enables continuously variable control of the motor speed, which again enables adaptation of the performance to a given requirement.

An operating panel on the motor terminal box enables setting of required setpoint as well as setting of pump to "Min." or "Max." operation or to "Stop". The Grundfos Eye indicator on the operating panel provides visual indication of pump status:

- "Power on": Motor is running (rotating green indicator lights) or not running (permanently green indicator lights)
- "Warning": Motor is still running (rotating yellow indicator lights) or has stopped (permanently yellow indicator lights)
- "Alarm": Motor has stopped (flashing red indicator lights).

Communication with the pump is possible by means of Grundfos GO Remote (accessory). The remote control enables further settings as well as reading out of a number of parameters such as "Actual value", "Speed", "Power input" and total "Power consumption".

The terminal box holds terminals for these connections:

- one dedicated digital input
- two analog inputs, 0(4)-20 mA, 0-5 V, 0-10 V, 0.5 3.5 V
- 5 V voltage supply to potentiometer and sensor
- · one configurable digital input or open-collector output
- Grundfos Digital Sensor input and output
- 24 V voltage supply for sensors
- two signal-relay outputs (potential-free contacts)
- · GENIbus connection
- interface for Grundfos CIM fieldbus module.

#### **Further product details**

Pump and motor are integrated in a compact and user-friendly design. The pump is fitted to a low base plate, making it ideal for installation in systems where compactness is important.

The state-of-the-art design and materials of the shaft seal ensure high wear resistance, improved sticking and dry-running capabilities and long operating life.

Servicing the pump requires no special service tools. Service parts are in stock for quick delivery and are available as kits, single parts or bulk. Service videos are available on www.youtube.com.

Frequency converter operation offers these functions:

- controlled operation, i.e. consumption flucturates
- constant pressure
- communication with the pump.

Adaption of performance through frequency-controlled speed offers obvious benefits such as:

- energy savings
- increased comfort

#### Position | Qty. | Description

control and monitoring of the application and pump performance.

An operating panel on the motor terminal box enables setting of required setpoint as well as setting of pump to "Min." or "Max." operation or to "Stop". The Grundfos Eye indicator on the operating panel provides visual indication of pump status:

- "Power on": Motor is running (rotating green indicator lights) or not running (permanently green indicator lights)
- "Warning": Motor is still running (rotating yellow indicator lights) or has stopped (permanently yellow indicator lights)
- "Alarm": Motor has stopped (flashing red indicator lights).

Communication with the pump is possible by means of Grundfos GO Remote (accessory). The remote control enables further settings as well as reading out of a number of parameters such as "Actual value", "Speed", "Power input" and total "Power consumption".

### **Pump**

A combination of a stop ring and a Nord-lock® washer secures a tight and reliable fixation of the impeller spacing pipes to the splined pump shaft. It is possible to remove and fit the hydraulic parts from the pump side. The inlet and outlet port are integrated in the pump sleeve. The inlet part, chambers and discharge part are hold together by four staybolts and a retaining flange.

The pump is fitted with an unbalanced O-ring seal with a rigid torque-transmission system. It has a fixed seal driver ensuring a reliable rotation of all parts. The dynamic secondary seal is an O-ring.

#### Primary seal:

- Rotating seal ring material: silicon carbide (SiC)
- Stationary seat material: silicon carbide (SiC)

This material pairing is used where higher corrosion resistance is required. The high hardness of this material pairing offers good resistance against abrasive particles.

Secondary seal material: EPDM (ethylene-propylene rubber)

EPDM has excellent resistance to hot water. EPDM is not suitable for mineral oils.

The pump shaft is connected to the motor shaft through a left thread and tight fit. The shaft cannot be dismantled.

#### **Motor**

The motor is a totally enclosed, fan-cooled motor with principal dimensions to EN 50347. Electrical tolerances comply with EN 60034.

The motor efficiency is classified as IE5 in accordance with IEC 60034-30-2.

The motor requires no external motor protection. The motor control unit incorporates protection against slow- and quick-rising temperatures, e.g. constant overload and stalled conditions.

The terminal box holds terminals for these connections:

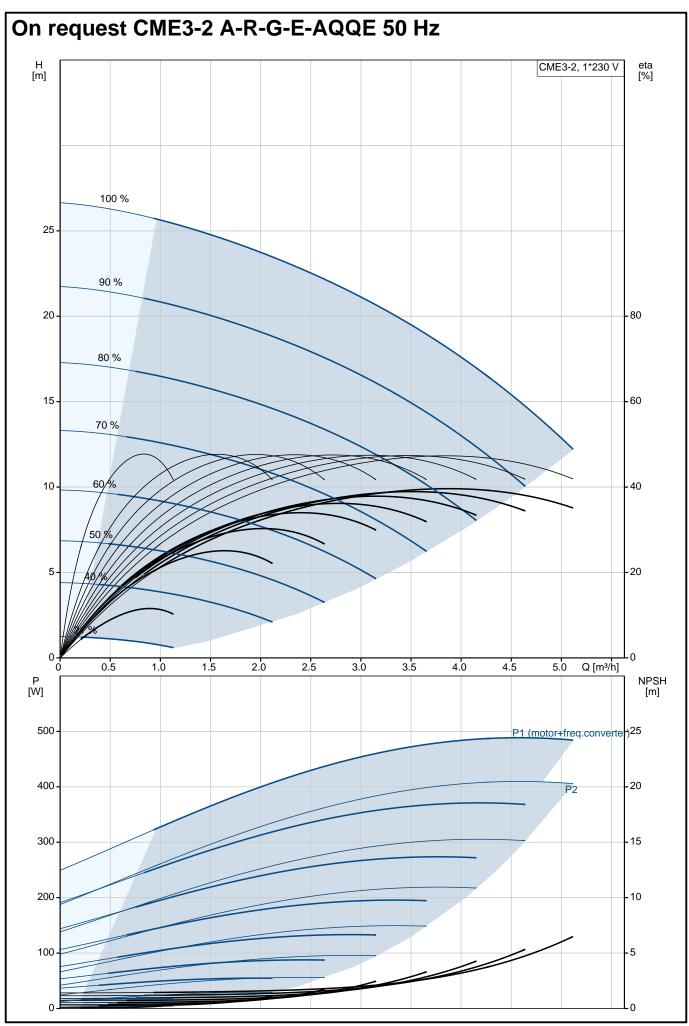

- · one dedicated digital input
- two analog inputs, 0(4)-20 mA, 0-5 V, 0-10 V, 0.5 3.5 V
- 5 V voltage supply to potentiometer and sensor
- · one configurable digital input or open-collector output
- Grundfos Digital Sensor input and output
- 24 V voltage supply for sensors
- two signal-relay outputs (potential-free contacts)
- GENIbus connection
- · interface for Grundfos CIM fieldbus module.

# On request CME3-2 A-R-G-E-AQQE 50 Hz

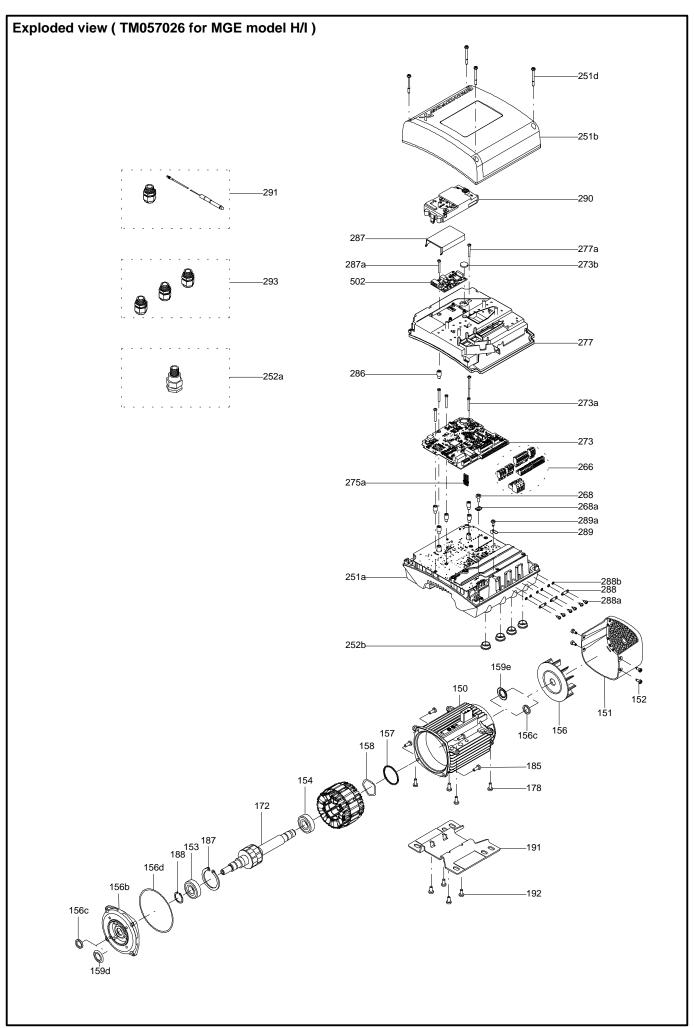

Note! All units are in [mm] unless others are stated. Disclaimer: This simplified dimensional drawing does not show all details.

# Parts list CME3-2, Product No. On request Valid from 2.1.2013 (1301)

	Pos	Description	Annotation	Données de classification	Référence		antité	Unite
+		MGE71A				1		pcs
		Cross recess countersunk screw				4		pcs
-	4.d	Chamber cpl.				1		pcs
		Chamber					1	
		Retainer for seal ring					1	
		Guide vane					6	
		Plate					1	
		Vane					1	
	45	Neck ring					1	
	65	Neck ring retainer					1	
•	4e	Chamber cpl.				1		pcs
	4a	Intermediate chamber					1	
	45	Neck ring					1	
	65	Neck ring retainer					1	
	5a	Chamber, empty				1		pcs
	6.a	Flange				1		pcs
	16	Collar sleeve cpl.				1		pcs
	25	Drain plug cpl.				2		pcs
	11	O-ring		Diameter: 18,5			1	
				Material type: EPDM				
				Thickness: 2				
	25	Plug					1	
	26	Hex socket head cap screw		Length (mm): 80		4		pcs
				Thread: M8				
	31	O-ring		Diameter: 114		1		pcs
				Material type: EPDM				
				Thickness: 3,9				
	32	Cover				1		pcs
		Cover plate					1	
		Plate					1	
	36	Lock nut		Thread: M8		1		pcs
	49	Impeller cpl.				2		pcs
	51	Pump shaft		Diameter: D12		1		pcs
	64	Spacing pipe				1		pcs
	64.c	Clamp				1		pcs
	66	Wedge lock washer				1		pcs
	76	Nameplate				2		pcs
-	105	Shaft seal				1		pcs
	102	O-ring		Diameter: 17,86			1	
				Material type: EPDM				
				Thickness: 2,62				
	103	Seal ring, stationary					1	
	104	Seal ring, rotating					1	
	107	O-ring					1	
	108	Compression spring					1	
	111	Retainer					1	
	112	Driver for shaft seal					1	
	111.a	Stop ring				1		pcs
	151	Fan cover				1		pcs
	152	Pan head thread forming screw				4		pcs
	156	Fan				1		pcs
